

FONTAINE® INFINITY

We named it Infinity for a reason ...
The ultimate aluminum/steel combo trailer that seems to run forever

FONTAINE® INFINITY

Aluminum/Steel combo flatbed and dropdeck trailers built tough and loaded with top quality components and accessories.

- Super strong Fontaine XtremeBeam™ mainbeams feature 25" steel webs and grade 130 steel load bearing flanges with continuous welds on both sides
- Steel I-Beam crossmembers are at 12" centers for added structural support
- Engineered, formed-steel siderail braces provide additional structural support
- RASR™ siderails withstand side impacts that send other trailers to the repair shop
- Aluminum floor with four full length 1 1/8" apitong nailing strips
- Rubber dock bumpers for rear impact protection, and mudflaps behind each axle to protect the trailer and other vehicles
- Broad product line:
 - Flatbed or dropdeck
 - Slide axle or fixed
 - Tandem or tridem
 - 45, 48 and 53 foot lengths
 - TX twist lock models for hauling containers
 - Forklift model works with multiple forklift brands

With 8 retractable twistlocks, the Fontaine Infinity TX handles typical dropdeck loads or two 20-ft containers, or one 40-ft container.

The perfect balance of strength, weight and economy

Fontaine® Infinity™ trailers combine steel mainbeams and crossbracing with aluminum siderails, floor and rear skirt. The result is a rugged, light-weight workhorse that delivers years of lasting performance.

The Fontaine® XtremeBeam™ mainbeams provide a worthy foundation. Built with heavy-duty steel flanges and welded continuously on both sides, the design and construction are so strong that we back it in writing with the exclusive XtremeBeam™ Limited Lifetime Warranty*. It's just one of the many reasons why more fleets and owner operators are earning their living with Fontaine® than ever before.

Contact your local Fontaine® dealer today, and put an Infinity™ flatbed or dropdeck trailer to work for you!

The versatile **Infinity SuperiorSlide™** trailer features independent sliding front and rear axles to give you **SUPERIOR** maneuverability for local city hauls ... and **SUPERIOR** stability on the highway. The versatile design enables you to be "street legal"* in all 50 states and Canada with a single trailer.

DURABLE

STROKER

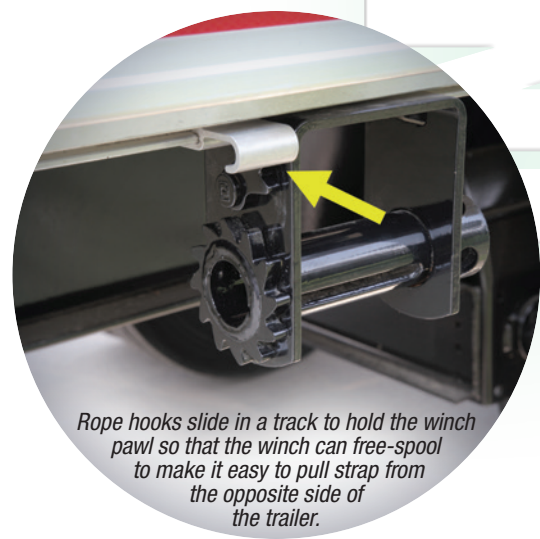

The steel front skirt features tapered steel corners for greater durability. A steel reinforced upper coupler plate minimizes distortion and makes coupling easier.

FONTAINE RASR

Routed Aluminum Side Rail

The patented RASR™ (Routed Aluminum Side Rail) is stronger and lighter than steel and makes load securement easier. It eliminates 180 weld failure points and is DOT rated the entire length.

Rope hooks slide in a track to hold the winch pawl so that the winch can free-spool to make it easy to pull strap from the opposite side of the trailer.

Air and electrical lines run down the center of the trailer for easy access and maximum protection from road debris.

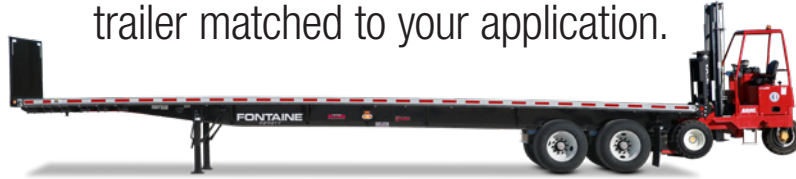

Single-piece, steel I-Beam crossmembers on 12" centers are supported by steel mainbeams built with grade 130 load bearing flanges. Engineered, formed-steel siderail braces provide added structural support.

FONTAINE® INFINITY

Your Fontaine Dealer can help you spec' an Infinity combo trailer matched to your application.

*Infinity fixed or sliding tandem air ride forklift flatbed
45' or 48' configurations • Frame rating 80,000 lbs distributed
