STRENGTH

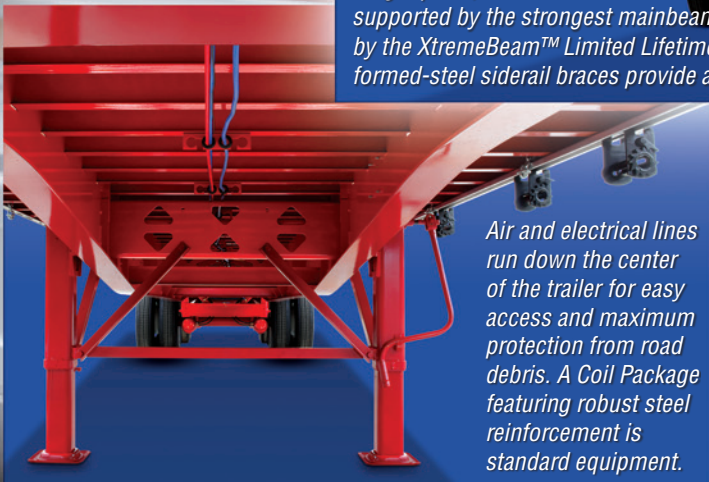

The steel front skirt features tapered steel corners for greater durability. A steel reinforced upper coupler plate minimizes distortion and makes coupling easier.

Infinity™

The perfect balance of strength, weight and economy

Single-piece, steel I-Beam crossmembers on 12" centers are supported by the strongest mainbeam in the industry. It's backed by the XtremeBeam™ Limited Lifetime warranty. Engineered, formed-steel siderail braces provide additional structural support.

Air and electrical lines run down the center of the trailer for easy access and maximum protection from road debris. A Coil Package featuring robust steel reinforcement is standard equipment.

Sliding strap retainers

Handy strap retainers slide in a track to keep straps in place so they do not drop while you are securing loads. They also serve as sliding rope hooks. Drivers really appreciate the added convenience.

Trailers this durable can only be called **INFINITY™**

Fontaine® Infinity™ trailers combine fabricated steel mainbeams and steel crossbracing with aluminum siderails, floor and rear skirt. The result is a rugged, light-weight workhorse that delivers years of lasting performance.

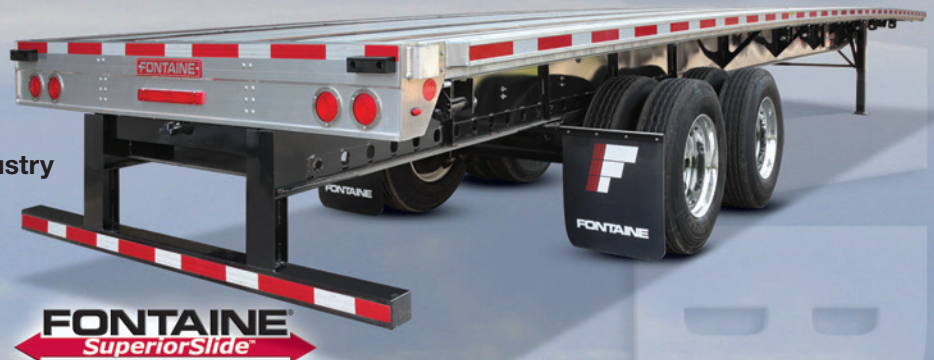

The mainbeams are the strongest in the industry, built with heavy-duty flanges and welded continuously on both sides. The design and construction are so strong that we back it in writing with the exclusive XtremeBeam™ Limited Lifetime Warranty*. It's just one of the many reasons why more fleets and owner operators are earning their living with Fontaine® than ever before. They know that Fontaine® offers:

- Industry leading product innovation
- The highest product quality
- The best resale value
- The most reliable performance in the industry
- The best warranty in the business

With 8 retractable twistlocks, the Infinity TX handles typical dropdeck loads as well as one 40-ft or two 20-ft intermodal shipping containers. You get the ultimate in hauling versatility and performance.

The NEW Infinity SuperiorSlide™ features independent sliding front and rear axles to give you **SUPERIOR** maneuverability for local city hauls ... and **SUPERIOR** stability on the highway. The versatile design empowers you to be "street legal"* in all 50 states and Canada with a single trailer.

The Routed Aluminum SideRail (RASR) is a one-piece aluminum extrusion. This exclusive design is significantly lighter than steel and withstands impact damage better than steel! Check out the video on our website to see for yourself!

Fontaine® Infinity™ trailers are available in popular configurations to meet the legal requirements of the U.S. and Canada.

Infinity™ TX twistlock container hauler with RASR siderails • Rear axle slide

Infinity™ low deck height dropdeck with RASR siderails (36" loaded rear deck height) • Tandem, spread and slide axle models
