

FONTAINE  
**VELOCITY**

Dollar for dollar...the best steel trailer on the road  
Loaded with standard features that make work easier

## FONTAINE VELOCITY

Steel flatbed and dropdeck trailers built tough and loaded with top quality components and accessories.

- Super strong Fontaine XtremeBeam™ mainbeams feature 25" steel webs and grade 130 steel load bearing flanges with continuous welds on both sides
- Steel I-Beam crossmembers are at 12" centers for added structural support
- Engineered, formed-steel siderail braces provide additional structural support
- Structural steel siderails and steel front and rear skirt for heavy-duty performance
- Full width 1 1/8" apitong flooring secured with two screws per board per crossmember
- Rubber dock bumpers for rear impact protection, and mudflaps behind each axle to protect the trailer and other vehicles
- Broad product line:
  - Flatbed or dropdeck
  - Slide axle or fixed
  - Tandem or tridem
  - 45, 48 and 53 foot lengths
  - TX twist lock models for hauling frac sand bins

### More for your money...

Fontaine Velocity™ is recognized throughout the industry as one of the most durable, rugged, hard-working trailers on the road. These durable flatbeds and dropdecks come standard with the specs that truckers need to get the job done. Plus, you always get more for your money with Fontaine®, from our top quality components and accessories, to the Fontaine XtremeBeam Limited Lifetime Warranty\*.

Contact your local Fontaine® dealer today, and put a Velocity™ flatbed or dropdeck trailer to work for you!

The versatile **Velocity SuperiorSlide™** trailer features independent sliding front and rear axles to give you **SUPERIOR** maneuverability for local city hauls ... and **SUPERIOR** stability on the highway. The versatile design enables you to be "street legal"\* in all 50 states and Canada with a single trailer.

# DURABLE

# FOUNTAINE

*The steel front skirt features tapered steel corners for greater durability. A steel reinforced upper coupler plate minimizes distortion and makes coupling easier.*

*Changing axle positions on slider models is fast and easy. You can balance your load for better performance while meeting the demands of USA and Canadian regulations.*

*Securement systems feature industry-leading convenience and are tailored to meet the requirements of USA and Canadian markets.*

*Air and electrical lines run down the center of the trailer for easy access and maximum protection from road debris.*

*Single-piece, steel I-Beam crossmembers on 12" centers are supported by steel mainbeams built with grade 130 load bearing flanges. Engineered, formed-steel siderail braces provide added structural support.*
